No need to recap---

One thing I wanted to point out to you and Angela--Christine said a couple of times in the meeting that "the Plan" represented "all that could be done to get the PCB's addressed in the river". --the next logical question is then--- "EPA would you support a UAA for the river--?" --- have you all talked about what it means to say that the plan would represent all that needs to be done to get PCBs addressed and if that does get done would you propose we move forward with a UAA?-- I suspect others might ask that question of you too---

Hopefully we did alright – good discussion although I'm not sure we were real specific. Let me know if you want to recap.

Thanks,
